

The Health Sciences Authority is the national authority regulating health products; managing the national blood bank, transfusion medicine and forensic medicine expertise; and providing critical forensic and analytical laboratory services. With our multidisciplinary expertise, HSA aims to be the leading innovative authority, protecting and advancing national health and safety.

Be at the forefront of the emerging Health Sciences Industry. If you are innovative and self-motivated, with a passion to excel, we invite you to join to us as:

### **SENIOR / REGULATORY SPECIALIST**

The Standard Drug List (SDL) is a drug formulary established by the Ministry of Health to provide the public healthcare institutions with clinically essential and cost effective drugs for the management of common diseases in Singapore. The Pharmacoeconomics and Drug Utilization Unit is a team of regulatory specialists that provides technical and secretariat support. The core responsibilities of the team are:

- To provide clinical and economic assessments of drugs for inclusion in the SDL
- To manage and maintain the SDL
- To support the Ministry of Health in the development of policies related to drug use

#### **Qualification and Experience**

- Undergraduate degree in Pharmacy from a recognized University
- Registered pharmacist with the Singapore Pharmacy Council
- Minimum 2 years of working experience in a patient care setting
- Applicants with post-graduate training in clinical pharmacy, epidemiology, healthcare management or related fields will be relevant and useful

Send us your detailed resume including your academic achievement, relevant experience and a recent photo to:
