

FINAL
ANNOUNCEMENT

Pioneering Care for Tomorrow 25th Singapore Pharmacy Congress

12-13 September 2015 • Grand Copthorne Waterfront Hotel, Singapore

www.PharmacyCongress.org.sg

CPE points will be awarded

Message From Organising Committee

Dear colleagues and friends,

It is my pleasure to invite you for the 25th Singapore Pharmacy Congress (SPC) to be held at Grand Copthorne Waterfront Hotel from September 12 – 13, 2015.

This year Congress theme is 'Pioneering Care for Tomorrow'. It is selected to depict pharmacists' commitment in bringing the best and latest evidence-based care to patients in the not so distant future and we hope to bring up interesting and refreshing topics that will keep you updated on latest development in various pharmacy arenas including unveiling the national roadmap for pharmacy landscape.

It is also a special event as it is jointly organised by the Pharmaceutical Society of Singapore and the Department of Pharmacy, National University of Singapore, to mark the 110th Founding Anniversary of both bodies

The 25th SPC will be an invigorating gathering and we look forward to see you in the congress!

Ms. Yong Pei Chean

*Chairperson, Organising Committee
25th Singapore Pharmacy Congress*

About the Pharmaceutical Society of Singapore

The Pharmaceutical Society of Singapore (PSS) is the professional organisation representing pharmacists in Singapore. Founded in 1905 as the Straits Pharmaceutical Society, today it is steered by an elected council comprising of a president and 11 council members. Our membership comprises of pharmacists practicing in the community, hospital, marketing/sales/ distribution and academic sectors. PSS is a non-profit organisation.

The mission of PSS is to "Maximise the contribution of pharmacists to the healthcare of Singaporeans". To this end, we have adopted a two-pronged strategy - to upgrade pharmacists professionally and to reach out to the public through health education programmes.

The society aims to provide Singaporeans with high quality pharmaceutical services, which emphasise safe, efficacious and cost effective drug treatments.

MISSION

- To maximise the contribution of pharmacists to the healthcare of Singaporeans

OBJECTIVES

To provide leadership that will enable pharmacists:

- To provide high quality pharmaceutical services that fosters the efficacy, safety, and costeffectiveness of drug manufacturing, distribution and use
- To contribute to programmes and services that emphasise the health needs of Singaporeans and the prevention of disease, and
- To promote pharmacy as an essential component of the heathcare team

About the National University of Singapore, Department of Pharmacy Faculty of Science

Pharmacy has been inseparable from mankind's history since it fulfils one of our most basic needs. As man made his way through remote times or places, he reached out, often blindly, towards the resources of nature for cures and remedies of diseases and in the process gradually developed pharmaceutical theories, techniques and implements. The person supplying this essential service is known as a Pharmacist in modern times though he has been designated in a variety of ways throughout the ages.

Pharmacy is a profession concerned with an applied science of preparing from natural and synthetic sources suitable and convenient materials for distribution and use in the treatment and prevention of diseases. The applied science is firmly rooted in physical, chemical and biological sciences. It embraces a knowledge of the identification, selection, pharmacological action, preservation, combination, analysis and standardisation of medicines and their proper and safe distribution and use. A specialist in medications and the outcomes of their use on the healthy and sick must have a broad scientific education. The Pharmacy course is designed to give the student a solid groundwork in the relevant sciences.

PHARMACY VISION

- To be a leader in shaping healthcare through innovative pharmaceutical education, research and practice

PHARMACY MISSION

- To develop competent human capital for the healthcare and pharmaceutical sectors that makes a difference in human health
