### SYNOPSIS

This webinar will explain what Cardiac Contractility Modulation therapy is, how it works, and what you can expect in terms of outcomes when utilizing this treatment for NYHA Class III patients who remain symptomatic in spite of guideline directed medical therapy. The faculty will share their personal experiences and what they have learned about **CCM®** therapy using case-based examples that include the means by which they have increased their awareness of how to identify appropriate candidates for this important new device therapy for patients with heart failure who have few or no other options.

### LEARNING OBJECTIVES

1. Review the need and assessment tools for diagnosing NYHA Classification
2. Discuss Guideline Directed Medical Therapy for the treatment of Heart Failure
3. Introduce **CCM®** technology and the indications for patient selection
4. Review the mechanism of action around **CCM®** technology
