

Manager (QA & Regulatory Pharmacist)

Responsibilities:

You will be responsible to manage and implement QA Control and Pharmaceutical regulatory programs and initiatives with customers in support of company's business growth. As the Regulatory Pharmacist, you are to provide directions for developing, implementing and maintaining the regulatory permit/license to meet Health Science Authority requirements.

In this position, you are also expected to facilitate internal and external audits at site level for all Healthcare sectors-related ISO/regulatory certifications. You must be able to provide advice and assist on any regulatory or quality issues in the capacity as a pharmacist. As a team leader, your role also includes supervising and managing the QC staff in the kitting and redressing operation.

Requirements:

You are required to be Registered Pharmacist with Degree qualifications in Pharmacy or equivalent and at least 5 years of working knowledge of Quality Assurance/In-process quality control and regulatory permit. Strong background in Operations Management and CGMP/ISO9001/ISO13485 is expected for this position. You must also possess excellent understanding in ISO Quality Management Systems and Regulatory Certification audit requirements.

As a team leader, you must be able to lead a quality and regulatory team and display strong analytical and management skills. Candidates with professional affiliations (e.g. Lead Assessor for ISO13485/ISO9001/ISO18001/ISO14001) will be preferred.

Working Location: Changi South (5 days)

The successful candidates can expect a competitive remuneration package and rewarding career in a global company and challenging environment.
