

Pharmaceutical Society of Singapore CPE Series

Informed Consent – Is It Enough to Protect the Patients?

Synopsis:

As the pharmaceutical/biomedical R&D landscape becomes more sophisticated, so are the challenges and the medico-legal framework designed to protect the patients and other stakeholders.

Come and interact with our panel of experts from the clinical research industry and authority in biomedical laws/ethics as they share their experience and perspectives in clinical research.

Gain latest insights as to how Singapore and international jurisdictions deal with today's challenges in clinical trials with respect to legal and ethical dimension of informed consent.
