1 ABOUT your medicine?

Co-dergocrine is used to improve mental functions related to deteriorations with age. These include decreases in mental capacity, concentration, mood and intellectual abilities. Co-dergocrine can be used together with other medicines in elderly patients with mild to moderate dementia. Co-dergocrine can also be used in the prevention of migraine attacks.

2 HOW should I take the medicine?

Co-dergocrine may be taken before, with or after food, one to three times daily.

3 What should I do if I FORGET a dose?

Take this medicine exactly as directed by your doctor. If you miss a dose, take it as soon as you remember unless it is almost time for the next scheduled dose. In that case, skip the missed dose and take the next one as directed. Do not double the dose to make up for the missed dose.

4 What are the possible SIDE-EFFECTS of the medicine?

The more common side-effects include stomach disturbances, nasal stuffiness and headaches. Taking this medicine with or after food can minimize some of these side-effects.

5 What PRECAUTIONS should I take?

Co-dergocrine should not be taken during pregnancy or breast-feeding, unless your doctor tells you to do so. Inform your doctor should you experience severe slowing down of the heartbeat. Inform your doctor should you be also taking any other medicines, including anti-hypertensives (for lowering of blood pressure).

6 How should I STORE the medicine?

Store the medicine in a cool, dry place. Protect from moisture, heat and direct light.
