

MONTELUKAST (SINGULAIR®)

How to take Montelukast (Singulair®) granules/tablets?

General point(s) to note:

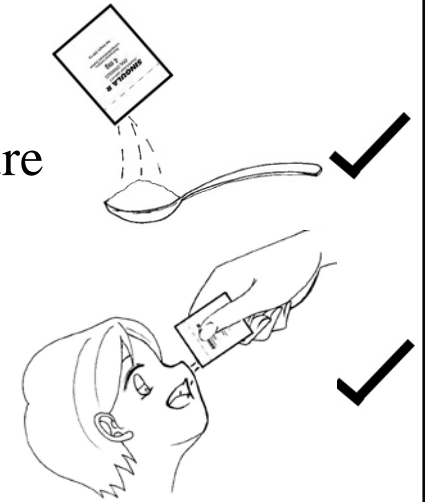

- The granules/tablets should be consumed within 15 minutes of opening the blister pack/sachet.

If your child is taking:

4 mg Oral granules

- The medication can be mixed with a spoonful of the following room temperature food: apple sauce, mashed carrots, breast milk, porridge, rice, milk or water.
- Alternatively, the medication can be fed directly into the child's mouth.
- Do not dissolve or crush the granules

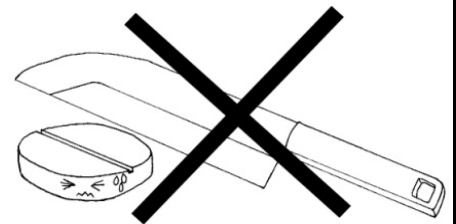

5 mg Chewable tablets

- Chew well before swallowing.

10 mg Oral tablets

- Swallow whole, do not crush, cut or dissolve the tablets.

Consult your doctor or pharmacist (Pharmacy: 6394 1500/1501) if you need more information.
